

# WORLDWIDE HOSPITALITY PAYMENT SOLUTIONS

**Our innovative multi-currency payment solutions offer powerful competitive advantages to improve your bottom line and enhance guest experience.**

ONE PARTNER. ONE PLATFORM. PLANET PAYMENT

# Global Payment Solutions

## Help International Guests Feel at Home®

**Payment Processing** of both multi-currency and domestic transactions offers hoteliers end-to-end authorization, capture, settlement and clearing services for major credit and debit card types, for both magnetic stripe and EMV (chip and pin) transactions. Along with localized language support, we offer hoteliers online access to best-in-class reconciliation and reporting services across your worldwide business operations.

**Pay In Your Currency**® lets international guests enjoy the clarity and convenience of paying for their stay in their own currency. Our solution offers a personalized payment experience so the guest knows at the point of sale the amount they paid in their currency, while hoteliers continue to enjoy the ease of settlement and reporting in their local currency.

**FX Assured**® couples the convenience and clarity of Pay In Your Currency with the added benefit of our 'Best Rate Guarantee'. Using our patented rate-calculation methodology, we offer the cardholder an individualized exchange rate calculated to be better than the effective exchange rate that would have been charged by their credit card provider.

**The MICROS Payment Gateway**, a fully-managed solution hosted by Planet Payment, delivers multi-currency processing across all MICROS hospitality and restaurant systems, for all major credit and debit cards, EMV smartcards and Interac PIN debit transactions. Our Pay In Your Currency solution, cardholder tokenization and transaction encryption are seamlessly integrated.

**Multi-Currency Pricing** helps hoteliers target international markets on their websites and increase global sales by allowing international customers to view pricing and pay in their home currencies.

## Global Transactions . . .

**An Austrian** family skis down a wintry mountain at an indoor resort in the desert sands of **Dubai**. **Pay in Your Currency** lets the skiers feel even more at home when they pay for their fun and après-ski meal in Euros.

**A Hong Kong** hotelier asks his local bank to provide payment processing for his new casino in Macau. Planet Payment helps the Hong Kong bank enter a new region, offering both **Domestic** and **Multi-Currency Processing** to the bank, without costly investment.

# Global Partner Network

Planet Payment's services are offered through our network of the world's leading acquiring banks, processors and payment technology providers.

## A Powerful Network of International Banks

Through our strategic partnerships with many of the world's leading acquiring banks and processors, Planet Payment delivers multi-currency and domestic payment solutions across North America, the Middle East and Asia-Pacific. Other payment processors are usually limited to supporting your business only within a specific geographical region.

Planet Payment's single, currency-neutral processing platform and our integrated position within the current credit card process enables global deployment of our innovative payment solutions with robust online reporting and reconciliation tools. Our solutions allow hoteliers to increase profitability and efficiency of their global operations.

## Seamless Integration with Your Payment Technology Providers

Planet Payment's global payment solutions are offered seamlessly across all points of guest interaction, whether at the front desk, retail shop, restaurant, spa or on your website. Our network of global payment technology providers including property management systems, gateways / EFT services and terminal manufacturers have integrated our multi-currency processing solutions into their products and certified interfaces directly to our platform.

Your international guests enjoy the same purchase experience across your global portfolio, while you benefit from the increased profitability and operating efficiency derived from the same point-of-sale infrastructure and business processes, irrespective of region, acquirer or technology.

## Planet Payment/MICROS Payment Gateway Solution

- Fully managed solution for both MICROS PMS and food/beverage point of sales systems
- Domestic and multi-currency transaction processing and/or routing, consolidated reporting
- Single interface to over 45 international acquiring banks and processors

## About Planet Payment

Planet Payment, a leading international payment and data processor, provides internationally focused banks and their merchants with innovative solutions that enable them to accept, process and reconcile payments, anytime, anywhere and in any currency. Our network of more than 45 acquiring banks and processors stretches from North America, to the Middle East, to Asia Pacific.

We offer banks and their merchants innovative payment solutions that can differentiate product offerings and improve profitability, no matter where in the world they are located. Our solutions help merchants transform credit card processing from a cost center into a highly effective and sales tool delivering enhanced customer service to valued international cardholders. We deliver increased transparency to cross-border commerce and offer international cardholders, whether online or in shops, restaurants or hotels, the comfort and convenience of paying in the currency they know best – their own.
