

We have an immediate need for a **SQL Server DBA (Admin/Architect)** in our New Castle, Delaware office.

Position Summary

The **SQL Server DBA** will provide strategic guidance, advanced support and administration on the Microsoft SQL Server infrastructure deployed within the company, while following and maintaining security best practices and policies. The ideal candidate will fit in with the team / culture and be eager for training – the candidate doesn't necessarily need to meet all of the skill requirements listed below.

Job Responsibilities

- Configure and support MS SQL Availability groups.
- Applying security best practices and methodologies
- Experience performance tuning very large databases
- Evaluate, write, and debug T-SQL, SQL code
- Functional knowledge of Idera Diagnostic Manager or equivalent
- Experience with alerting functions related to SQL Server and monitoring tools
- Developing and applying SQL performance related tools and functions
- Defining and establishing operational processes
- Adhere to change control and release procedures
- Providing in-depth support to dependent teams and functions
- Develop, write and deploy Reports using SQL Server Reporting Services
- Flexible scheduling may be required from time to time.
- Define and advise on opportunities for improvement on SQL Server security
- Monitor subject matter expert Internet sites relating to SQL server security vulnerability and good practices
- Identify and enforce least privileges methodology to SQL servers and databases
- Identify and enforce enhanced logging and relevant security controls within Microsoft SQL Server
- Review system and Microsoft SQL logs for unexpected entries and audit logging
- Maintain user access administration and auditing
- Comply with access control requirements and ensure that change control and line management are aware of changes that may impact sensitive information
- Monitor system availability and activity where applicable

Job Requirements

- At least 5 years' experience with Microsoft SQL Server 2000-2016
- Experience with MS SQL clustering including installation
- Experience with MS SQL Mirroring
- Experience with MS SQL Availability groups
- Experience with MS Windows Clustering
- Demonstrated experience with T-SQL and SQL coding
- Expertise with SQL Server Reporting Services
- Ability to discuss and apply security related initiatives
- Excellent SQL Server performance tuning and troubleshooting capabilities
- Exposure to and knowledge of operational processes
- Understanding of the concepts of structured data storage and retrieval
- Ability to multi-task and prioritize tasks appropriately
- Excellent communication and collaboration skills

Work Environment: Fast-paced, and holds a high-level of responsibility to ensure timelines are met accordingly.
